In the event of a claim against the railroad for loss or damage of commodity, settlement will be made based upon the complete seven (7) digit STCC provided on the original billing instructions or bill of lading.

GOVERNING CONDITIONS, RULES AND REGULATIONS

ITEM 320.00 D

CHANGE: ADDITIONAL WORDING

ORDERING OF CARS FOR GRAIN SHIPMENTS

CAR ORDERS TO BE PLACES BY SHIPPER ONLY

Car orders will not be accepted by grain companies or other commercial enterprises representing grain shippers, but must be placed by the elevator or loading station at which the cars will be physically loaded.

CAR ORDERS WILL BE ACCEPTED ONLY TO FILL AVAILABLE SLOTS

ICE will determine how many available cars for loading we will have for any given month. If ICE determines that it is unable to supply sufficient cars for loading, we WILL NOT accept any more new car orders for current or upcoming months until such time as it is determined that cars will be available for loading. Notification will be given in the event that we no longer will be taking new car orders. If a car order is accepted and assigned a unit number, but not filled by end of the month that it is ordered for, this order will carry forward into the following month.

STANDBY LIST

If a shipper wants to order cars for a month that is already booked up, they may do so by requesting to be placed on a "standby list". If cars become available, car order(s) will be filled in the order that they were placed on the standby list. If cars do not become available by the end of the month, the "standby list" will be terminated and WILL NOT carry into the next month. Car orders on the "standby list" are NOT assigned a unit number until such time when order is filled.

CHANGES IN ORDERS & TRANSFERRING ORDERS

Car orders may be transferred between elevators. Car order size cannot be modified as a result of the transfer. Arrangements for the physical transfer of the car order must be made with the Car Distributor in Sioux Falls, SD (605/782-1409). Transfers will not be accepted if notice is given on less than seven (7) days notice prior to the "want date." It shall be the responsibility of the elevator ordering the cars to find a party to trade out an order for equipment that was ordered but not needed or wanted. Each order is allowed one change in "want date" or "loading station" within the month that the equipment is wanted. The change in "want date" or "loading station" will not be accepted if notice is given less than seven (7) days prior to original "want date".

PLACING ORDERS

Car orders will be accepted for future shipments up to a maximum of three (3) months in advance of want date, commencing on the first Monday of each month. Example: On the first Monday of July, orders will be accepted for the month of October of that year. Car orders will be accepted by facsimile (605/782-1497). Order forms are included at the end of this item. Please fill out the form as completely as possible. Want date must be specified to enable ICE to place cars as accurately as possible. The order number must be applied on the bill of lading, subject to item 310.00.

PLACING ORDERS – UNIT SIZE

In order to qualify for multi-car rate, separate orders need to be placed for multi-car units vs. single car orders. When multi-car and single car order is requested for same want date, if sufficient number of cars are physically placed for the multi-car order, demurrage will commence on the multi-car unit. Multi-car unit is described as minimum 25, 50, or 75 cars. Cars for multi-car orders must be loaded consecutively, subject to item 560.00. Orders for equipment shall not exceed the track capacity of the loading facility. Only one order sheet, per want date, for number of cars not exceeding track capacity will be accepted each day. Car orders will not be accepted from elevators or loading stations for days on which ICE does not provide regular train service. For example, if elevator or loading station only receives train service on Tuesday and Friday, ICE will not accept car order for placement or want dates on Monday, Wednesday or Thursday. Car orders may not be placed for consecutive want dates for loading. Want dates cannot be less than four days apart for any one loading station. For participants in the KCS program, the following applies: There must be a minimum of two (2) days between the want date for KCS equipment and a subsequent order for ICE equipment. There must be a minimum of (4) days between the want date for ICE equipment and a subsequent order for KCS equipment.

CANCELLATION PENALTY

ICE will assess a cancellation penalty charge of one hundred and fifty (\$150.00) dollars per car against any car order cancelled or if cars are refused when offered. Penalty charges will be assessed to the elevator placing the car order. Requests for cancellation of car orders shall be sent, in writing, via facsimile to the Car Distributor, Sioux Falls, SD: 605/782-1497. If constructive or actual placement has been performed on or one day prior to want date or any day thereafter, and the car(s) are subsequently released back to the carrier without being loaded and billed via the ICE, a switch charge of \$350.00 per car will be assessed in addition to the \$150.00 per car cancellation fee. If ICE fails to place OR OFFER cars FOR PLACEMENT within fifteen (15) days of the "want date" specified on the car order, the car order will be cancelled, upon request, free of charge. (A)

**NOTE:** In connection with 25, 50, or 75 car multiples, rates will apply to more than one consignee or destination providing that all of the cars in 25, 50 or 75 car unit are routed to the same connecting carrier at the specific gateway. Bill of lading or shipping instructions must be crossed referenced in order for the multi-car rate to apply.

## GOVERNING CONDITIONS, RULES AND REGULATIONS

ITEM 420.00 B

CHANGE: ADDITION TO RULES & CHARGES

### MAXIMUM GROSS WEIGHT LIMIT ON LINE-HAUL TRAFFIC

Maximum gross weight limit (MGWL) is the sum of lading weight and the stenciled tare weight of the car.

The Maximum Gross Weight Limit on Grain moving in line-haul service under ICE local rates or charges or on ICE's portion of a combination rate, or through rates and charges cannot exceed total of load limit plus tare weight stenciled on car, with a maximum of 286,000 lbs. Loaded equipment cannot exceed the MGWL as stenciled on the side of the car. For example, if equipment is stenciled as 268,000 lbs. MGWL, load plus tare weight must not exceed this weight in order to avoid overload penalty.

Overload penalties provided in ICE 8100-Series will be strictly enforced.

**NOTE:** Maximum gross weight limitations outlined in this item apply only on traffic handled while in line-haul service on Iowa, Chicago, & Eastern Railroad. It is the responsibility of the loading shipper to verify capacity limits of connecting carriers.

### LOW CAPACITY/HIGH CAPACITY EQUIPMENT

Low capacity equipment is defined as less than 286,000 lbs maximum gross weight limitation.

High capacity equipment is defined as 286,000 lbs maximum gross weight limitation.

The high cap rate will apply on all equipment which has a maximum weight limitation of 286,000 lbs.

**EXCEPTIONS:** If a high cap car is light-loaded from an ICE origin that is capable of handling 286,000 lbs MGWL, to a destination or via a route that is not 286,000 lbs MGWL capable, notation must be made on original billing or bill of lading that car has been light loaded. Failure to note on original billing or bill of lading will result in the high cap rate being assessed. If a high cap car is placed for loading at an ICE origin that is not capable of handling 286,000 lbs MGWL, car must be light loaded to a maximum gross weight limitation of not more than 263,000 lbs. High cap cars that are loaded from origins not capable of handling 286,000 lbs MGWL will be subject to overload penalties as found in item 500. **NOTE:** where no rate is listed for high capacity equipment indicates that this station or route is not capable of handling 286,000 lbs MGWL equipment and cars **MUST** be light loaded.

### HIGH CAP COVERED HOPPER LOADING TO LESS THAN CAPACITY (A)

All high cap covered hoppers as described above that are loaded to less than their capacity, **MUST** be loaded in one of the following manners:

- All three compartments loaded equally (preferred method).
- Each end compartment loaded fully and equally with center compartment loaded light.

This will ensure balance while cars are moving. Cars not properly loaded can increase the risk of derailments and cause safety hazards.

High cap covered hoppers found to be loaded incorrectly will immediately be placed on hold status. Hold charges of \$60.00 per car per day commencing at 0001 hours after notification of the unbalanced load will be assessed to the loading facility.

ICE will contact the loading facility to adjust the load. The load facility must make all arrangements and bear all costs associated with the adjustment of the load. Only after the load has been adjusted will the car be released from hold status.

When a given shipment has reached destination but is refused or rejected and not unloaded and is returned to the original shipping point (for reasons other than carrier's error), the return movement will be subject to the rate and minimum weight in the reverse direction in effect on the date shipment is tendered for return, or to the rate normally applicable for such return movement if lower. In no case, however, will charges for the return shipment exceed charges, which would be applicable on the return movement without reference to this rule.

(See Notes and Exception)

**NOTE:** Routing for the return movement will be applicable only via the reverse of the route over which the original shipment moved, except in the case of emergency routing order.  
In connection with shipments subject to multiple car rates, if less than the originally shipped number of cars are rejected, the applicable single car rate will apply on the rejected, returned carload(s) of freight.

**USE OF PRIVATELY OWNED OR LEASED CARS FOR GRAIN LOADING**

Privately owned or leased covered hopper cars need to be interchanged to the ICE in blocks of not less than 25 cars. Cars in blocks less than 25 cars will not be accepted and if they are interchanged to ICE, they will be subject to the single car rate once loaded and billed from the origin facility. Any exceptions to this must be approved and confirmed in writing by the Car Distributor in Sioux Falls, SD 605/782-1409.

Permission must be obtained to place privately owned or leased covered hopper cars on ICE from Car Distributor in Sioux Falls, SD 605/782-1409 prior to interchange to ICE.

Complete list of car initials and numbers to be interchanged to ICE must be faxed to the Car Distributor a minimum of 48 hours prior to interchange to ICE. Fax: 605/782-1497.

Cars accepted by ICE for loading must be billed direct to the loading elevator. The loading elevator will be responsible for coordinating the placement of these cars with placements of any other rail equipment that may be en route to their facility.

"Want dates" cannot be deferred for system car orders in preference for the loading of private cars. The cancellation penalty as provided in item 320.00 of this tariff will be assessed for system cars not accepted when offered (see note).

Private cars cannot be used against existing system car orders (see note).

Private cars cannot be mixed with system cars to make up multiple car units of 25, 50 or 75 cars (see note).

It is the responsibility of the party placing private cars on the ICE to make sure that cars do not return to the ICE unintentionally. If cars return to ICE in error, they will be subject to charges found in tariff CARH 3002-Series.

Mileage allowance payments for privately owned or leased covered hopper cars placed on ICE for loading will NOT be paid.

Non-compliance to any of the above will result in cars being rejected at interchange and any switching or other charges will be assessed to the party assigning cars to ICE.
