B. All railcars used for the transportation of ruminant or non-ruminant materials must be privately owned or leased. DME and ICE handle these cars as requested by the customer. Therefore, DME and ICE are not party to a company's practices and policies in compliance with the Federal Regulations. C. Currently, all cars that carry an AAR "N" designation do so because they have handled ruminant material at some point in their loading history. DME and ICE do not require, but strongly encourage all shippers that own or lease rail cars used to transport ruminant materials be kept completely segregated from non-ruminant materials. Non-ruminant materials that are directed for loading in cars that carry an AAR "N" designation must be destined to an end point of consumption respective of the proper end use of the product.

MISCELLANEOUS RULES AND CHARGES

MAXIMUM GROSS WEIGHT LIMITATION ON LINE-HAUL TRAFFIC

ITEM 420.00 A

ISSUED DATE: JANUARY 8, 2009
EFFECTIVE DATE: JANUARY 8, 2009
CHANGE: ADMINISTRATIVE UPDATE

The Maximum Gross Weight Limitation (MGWL) applies individually to equipment and track.

- A. The maximum gross weight limitation in equipment cannot exceed the sum of the lading weight and the stenciled tare weight of the car.
- B. The **track maximum gross weight limitation on Grain Products** as specified in this tariff cannot exceed the track capacity for the station or routing as outlined in the individual items. **(N)**
 - 1. Overload penalties provided in CARH 6000-Series Rules and Regulations Tariff will be enforced.
 - 2. Maximum gross weight limitations outlined in this item apply only on traffic handled while in line-haul service on the CARH properties. It is the responsibility of the loading shipper to verify capacity limits of connecting carriers.

LOW CAPACITY/HIGH CAPACITY EQUIPMENT

- A. Low capacity (low cap) equipment is defined as less than 286,000 lbs maximum gross weight limitation.
- B. High capacity (high cap) equipment is defined as 286,000 lbs maximum gross weight limitation.
 - 1. The high cap rate will apply on all equipment which has a maximum weight limitation of 286,000 lbs.
 - a. If a high cap car is light loaded from a ICE origin that is capable of handling 286,000 lbs MGWL, to a destination or via a route that is **not** 286,000 lbs MGWL capable, notation must be made on original billing or bill of lading that car has been light loaded. Failure to note on original billing or bill of lading will result in the high cap rate being assessed.
 - b. If a high cap car is placed for loading at a ICE origin that is **not** capable of handling 286,000 lbs MGWL, car must be light loaded to a maximum gross weight limitation of **not** more than 263,000 lbs. High cap cars that are loaded from origins **not** capable of handling 286,000 lbs MGWL will be subject to overload penalties as found in CARH 6000-Series Rules and Regulations Tariff.
 - c. Where no rate is listed for high capacity equipment indicates that this station or route is **not** capable of handling 286,000 lbs MGWL equipment and cars **must** be light loaded.

HIGH CAP EQUIPMENT LOADING TO LESS THAN CAPACITY

- A. Cars not properly loaded can increase the risk of derailments and cause safety hazards. To ensure balance while cars are moving, all high cap equipment loaded to less than their capacity must be loaded in one of the following manners:
 - 1. All three compartments loaded equally (preferred method).
 - 2. Each end compartment loaded fully and equally with center compartment loaded light.
- B. High cap covered hoppers found to be loaded incorrectly will immediately be placed on hold status. Hold charges commencing at 0001 hours after notification of the unbalanced load will be assessed to the loading facility.
 - 1. Holding Charge: **\$60.00 per car per day**
 - 2. ICE will contact the loading facility to adjust the load. The loading facility must make all arrangements and bear all costs associated with the adjustment of the load. Only after the load has been adjusted will the car be released from hold status.
